

Fleet Management SaaS

Designed with fleet owners and manager in mind, Ituran's fleet management platform is an essential tool for any company operating vehicles as part of its daily operations.

At the core of our solution, driver identification with real-time tracking and comprehensive reporting on vehicle location and status, as well as business-critical data to help optimize operations and make strategic decisions in real-time while improving driver safety, cutting operational costs (fuel, wear and tear and maintenance) and protecting from irregular usage.

Ideal for any fleet size and easily integrated into existing apps and operations, the system requires driver identification before ignition (KeyPad, Dallas key or card reader), and streamlines all vehicle and driver performance information into practical, actionable data. Managerial reports provide detailed data-analysis and bottom-line business insights.

The system comes complete with comparative trip reports, allowing you to map out the most efficient routes and timetables, reduce fuel expenses and save time.

1. Secure online web-based SaaS platform and IOS/Android app
2. Historical data (up to 7 years back)
3. Business Intelligence analysis on historical data provides critical insights for decision making
4. Smart virtual area management interface: polygon, routes and map references
5. Event manager for real-time vehicle/driver/location-related info
6. Fleet policy component to automate policy control
7. Indications and alerts via text message/e-mail
8. Push notifications from app
9. Powerful report engine which allows the design of tailored reports

Highlights

1

Supports operations and transforms information into practical and actionable data

2

Helps reduce ongoing operational and maintenance costs

3

Reliable, customizable and intuitive open software, scalable and ideal for any size and fleet type

4

Easily integrated into existing applications

Using analytic tools gives you a full view of fleet's activity and see where each and every vehicle is at any moment in time. Analysis presented in user-friendly reports provide information such as where stops are concentrated; what are the most frequent territories/locations for each vehicle; and when vehicle is most active

Add-Ons

Remote Ignition Control

Remote Ignition Kill System

Timekeeper

Off-Site Attendance Reporting System

Car Log Management

Car Log Management System & Analysis of Irregular Use

Additional Solutions

Reefer Monitoring

Fuel Management & Monitoring

Advanced Driver Assistance Systems Integration

Vehicle Health

Fleet Management

Mobile Asset & Cargo Tracking

Location Based Triggers

Driver Behavior & Safety
