

Scooter and Motorcycle Tracking & Theft Prevention

Avoiding traffic and the search for parking, convenience in an urban area, low fuel and maintenance costs, and caring for the environment are some reasons why people prefer two-wheel transportation.

To make sure your scooter or bike is never alone, Ituran developed a GPRS-based tracking and protection system for motorcycles and scooters. The solution is built around a shock sensor which when activated alerts the customer via text message when a violation occurs.

The system includes a unique app which displays the current location of your motorcycle or scooter, its location history, driving speed, speed exceptions, ignition state, engine on/off and geofence management and lets you control the shock sensor's sensitivity level. Upon receiving an alert customer contact our call center and an enforcement team is launched to thwart theft.

- 24/7 real-time tracking and notifications including in cases of tilt
- Remote access to location policies, motion sensor sensitivity and power consumption via mobile application
- Remote commands for enabling/disabling ignition
- Assessment of the position of both driver and motorcycle
- Management software that is designed to also be used by insurance companies and operators

Highlights

1

Protects two-wheel vehicles from vandalism and theft

2

Saves time, inconvenience and insurance related expenses

3

Allows to track the location of two-wheel vehicles 24/7

4

In case of theft, recovery teams guarantee to return stolen two-wheeler (available in supported countries)

Monitor the location of any two wheelers, and preventing theft and misuse. The real-time location is clearly displayed on a map to allow better monitoring and controlling the vehicle

Ituran provides all the software and hardware components required for this solution.

Ituran's Scooter GPS is a detection and protection system based on Ituran's flagship vehicle tracking device, adapted for the needs of motorcycles and scooters

Additional Solutions

Reefer Monitoring

Fuel Management & Monitoring

Advanced Driver Assistance Systems ADAS Integration

Vehicle Health

Fleet Management Software
